ASK ABOUT YOUR EVIDENCE

Choose a question. Check the evidence. Save your answer.

Ask in your own words. Choose the closest question, review its supporting evidence, then continue to a related question. EvidenceForge retrieves real passages; an authorized reviewer decides what supports the response.

QUESTION MATCH

Deterministic word matching · no AI answer

Ask about your evidence

Type the question naturally. EvidenceForge compares it with imported questions in the selected authorized workspace; it does not generate an answer or a new question.

Ask a question in your own words

Ask a question about your controls, policies, or evidence…

Find matching question

Context: Selected workspace · Selected questionnaire · select a version below if needed. Press Enter or use the search button. IDs stay internal.

STEP 01

Or choose a question from the imported questionnaire

The ask box above can select a question for you. This manual path remains available and uses readable names and question text; IDs stay in application state.

YOUR SELECTED QUESTION

Choose a question above to see its wording here.

The imported wording is shown before evidence search so you can verify you selected the right question.

RETRIEVED EVIDENCE · STEP 02

Which passages support your answer?

These are actual passages returned by the authorized grounding endpoint. Check that each one really supports your answer before citing it.

Evidence has not been searched yet

Choose a question, then select “Find supporting evidence.”

STEP 03 · RESPONSE

What answer can you support with these sources?

Your answer

Write what the evidence supports. It's okay to be unsure.

Response status

Needs Review

Selected sources 0

Select the passages that truly support your answer. Retrieval is not proof of compliance.

Save for review

Approve response

Edit and approve

Reject draft

Approval remains an explicit, server-authorized action. “Not sure” is a valid reason to save for review.

SUGGESTED NEXT QUESTION

No model-generated question

Continue with a real questionnaire question

Suggestions use imported question order, real saved-response status when available, and words shared with the current question or actually retrieved evidence. No question is generated by a model.

Search a question's evidence first

Ask a question above or choose one below, then retrieve its evidence to see a suggested next question.
